What's new at Action Hire?

- Plant Trailers
- Trencher
- Scaffolding
- Vacuum Excavation System
- Mitsubishi Lancer - Auto

Temporary Fencing

Make securing your worksite fast and easy with our extensive range of temporary fencing. Our fencing can be quickly and easily installed without the need to disturb the surface area by digging holes or laying foundations. All panels are approximately 2.5m long by 2m high, so simply measure the distance you need in metres, divide it by 2.5 and that's how many panels you need.

CALL FOR OUR LATEST WEEKLY RATES on 02 4872 1111

Trencher

Use our handy trencher for all your digging requirements, especially for laying pipes or cables for installing drainage. This unit will save your time and energy. Call us now on 02 4872 1111 to book your trencher.

SCAFFOLDING

Let our Scaffolding do the job for you. A great system to protect your workers and materials on repairs or constructions of large buildings.

Please phone our depot on 02 4872 1111 for our great pricing on our scaffolding

Ablution

Ablution Blocks

Available in two sizes, we can deliver our Ablution Blocks directly onto your Site with a minimum of fuss and effort.

Style 1 - 2 Heated Showers, 2 Freshwater Flush Toilets, 3 bay Urinal, 4 Vanities and towel dispensers

Style 2 - 3 Freshwater Flush Toilets, 2 bay Urinal, 3 Vanities and towel dispensers

* Electrical, Water and Sewage need to be hard connected (hirer's responsibility)

Vacuum Excavation System

The V250 Hydro Vacuum Excavation System offers municipalities and contractors a lower cost, portable system for potholing and vacuum applications. The trailer mounted unit features tandem axles for smooth ride between job sites. Wet or Dry remediation of spoil is possible using the three stage filtration process that includes a 2 micron washable filter. One man operation can be attained by using the reduction tools and hose extensions. A 31hp Yanmar diesel engine with electric start and throttle, powers the 946 Litre unit. Dual hydraulic cylinders and a full open door reduce dumping cycle time.
