## DO YOU NEED TO EXCAVATE? THEN WE HAVE THE EXCAVATOR FOR YOU

**E50B NEW HOLLAND EXCAVATOR—WITH GRAB AND RIPPER ATTACHMENTS TO HELP WITH THOSE HARD JOBS!!!!!!**

The wider cab provides an excellent view to the trench and surrounding work area. Hydraulic pilot controls give low effort, vibration free, accurate operation. Manipulators control the low pressure servo circuit that in turn opens the main control valves giving large excavator style operation.

The large operator platform and wider threshold make it easy to step on and off. The clever 3 post design combines maximum strength an ease of access.

The Ripper attachment allows you to clear rocks and debris out of the ground instead of using manual handling and then the Grabber attachment will grab the item such as a log to move with so much ease, no more back injuries with these attachments.

Swing the boom wide to the right or left to dig in difficult-to-reach spots, against walls, or into corners that would otherwise require hand tools.
